The colours on the chart are merely samples. Actual product colour may vary slightly depending on the application technique, surface, and production year. Our coloured PVC samples remain the best indicator of the true final product colour.

Kehl Window & Doors Double Nature Colour Coating™ offers superior long-term film integrity, colour and gloss retention for vinyl extrusions or other types of vinyl cladding. Double Nature Colour Coating™ will give you the confidence of knowing that the finish on your vinyl unit is the best available.

Selected pigments with heat reflective properties have been used to formulate Double Nature Color Coating™. This reduces heat build-up and maintains a low component material temperature that avoids warping. The ability to reduce temperature build-up for dark colours allows manufacturers of vinyl windows to offer a much wider range of colours than could be previously offered.
